Dear Bill:

Regarding your recent Radio Log, of WEAT AM, this letter will confirm reception of the WEAT programming during the period mentioned..

WEAT AM is liscensed to the city of WEST Palm Beach, Florida.

WE run both day and night patterns . Daytime WEAT can be heard from Key Largo to the Ft. Pierce area.... Daytime power 5 kilo-watts....

Nites, we can be heard basically in the Palm Beach County area...

Night time operating power is 1kw.

WEAT AM 850 has a 4-tower array, with studios and transmitter co-located in Lake Worth, Florida.

WEAT AM is currently formatted as full simulcast of the FM, I'm sending along some older bumper stickers from the country format.

We used to receive many DX latters, but to be honest, it's been 6 months since the last..... With WHDH on the same FREQ. it's rare that we hear the northeast..... Happy listening.

Bert Brown, CE
